There are internal and external cracks. The solicitation addresses the variation in interior and exterior based on the material. The stone is exterior to the building and has separate pricing on the pricing sheets from the internal cracks that are concrete. This repair work will be done by a performance specification as indicated in specification sections 030130 "Maintenance of Concrete" specifically section 030130-1.3.A.2 which refers to performance requirements for restoration. Also refer to specification section 044200-1.1.B "Exterior Stone Cladding". The parameters for repair of the cracks were set for anything larger than 1/16 of an inch.

There has not been a site survey completed by SOM to determine how many cracks along with the locations and depths. This will have to be accomplished by the D/B-C.
